In the Claims

1. (Twice amended) A method for displaying phases in which components of a system for providing a web architecture framework are delivered comprising the steps of:

(a) displaying a pictorial representation of an existing system including a plurality of components;

(b) presenting a first set of components of a system for providing a web architecture framework, the first set of components being indicia coded to indicate that they are to be delivered in a first phase; and

(c) presenting a second set of components of a system for providing a web architecture framework, the second set of components being indicia coded in a manner unique with respect to the indicia coding of the first set of components to indicate that the second set of components is to be delivered in a second phase.

7. (Twice amended) A computer program embodied on a computer readable medium for displaying phases in which components of a system for providing a web architecture framework are delivered comprising:

(a) a code segment that displays a pictorial representation of an existing system including a plurality of components;

(b) a code segment that presents a first set of components of a system for providing a web architecture framework, the first set of components being indicia coded to indicate that they are to be delivered in a first phase; and

(c) a code segment that presents a second set of components of a system for providing a web architecture framework, the second set of components being indicia coded in a manner unique with respect to the indicia coding of the first set of components to indicate that the second set of components is to be delivered in a second phase.

2

13.   (Twice amended)   A system for displaying phases in which components of a
system for providing a web architecture framework are delivered comprising:

(a)   logic for displaying a pictorial representation of an existing system including a
plurality of components;

(b)   logic for presenting a first set of components of a system for providing a web
architecture framework, the first set of components being indicia coded to indicate
that they are to be delivered in a first phase; and

(c)   logic for presenting a second set of components of a system for providing a web
architecture framework, the second set of components being indicia coded in a
manner unique with respect to the indicia coding of the first set of components to
indicate that the second set of components is to be delivered in a second phase.
